1 Introduction

This document serves as the codebook for the survey portion of the Minerva Research Initiative funded project, “The Political, Economic, and Social Effects of the United States’ Overseas Military Presence.” This survey contains nationally represented online surveys annually from 2018 to 2020 across 14 countries. The aim of the project is to understand how individuals view a variety of subjects in the context of United States military deployments within their country. The project uses two firms for conducting the survey, the Schmiedl group firm did the surveys for the countries of Germany, Italy, Japan, Korea, Kuwait, and the United Kingdom; Qualtrics conducted surveys of the Australia, Belgium, the Netherlands, the Philippines, Poland, Portugal, Spain, and Turkey. We have approximately 14,091 respondents for approximately nationally representative populations based on gender, age (over 18), and income.

The survey contained 50 questions and was available in each country’s major languages. Wave 1 of the survey started in September 2018 and concluded November 2018.

Wave 2 of the survey included one additional question about government trust. The second wave of surveys ran from July 2019 until August 2019.
